DETAILED ACTION

Claim Objections

Claim 16 is unclear because of the confusing use of commas and semicolons in the claim. For instance, on page 80, line 15 it is unclear whether Applicant intends for "NR" to be a descriptor for the "Y" variable or if "NR" is some other substituent that is not indicated on the compound. Further, commas rather than semicolons should probably separate the recitation of "O, S and Se" in line 15. Typically in compound claims, commas are used to separate between a listing of possible variable options and semicolons are used between the descriptions of the variables. Further clarification is requested.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 16 is rejected under 35 U.S.C. 102(e) as being anticipated by USP 6,545,164 to Waggoner et al. (herein referred to as "Waggoner").

Waggoner teaches compounds that act as fluorescent labeling reagents important to the detection of various molecules and compounds of interest (col. 4, lines 10-21). Particularly, in cols. 9 and 10, Waggoner illustrates compounds that read on instant claim 16. Each disclosed

Art Unit: 1743

compound contains a CY3 or CY5 portion that lends chirality to the structure similar to the compounds disclosed in the drawings in the instant application Figure 1. Thus, the instant claim is deemed to be anticipated, within the meaning of 35 USC 102(e), over Waggoner.

Allowable Subject Matter

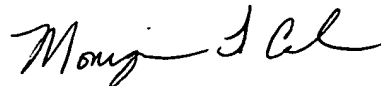

3. Claim 17 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest the compound recited in claim 17.
